

G-TECTA™

Portable Gas Detection Instruments Service and Repair Offer.

All G-TECTA instruments need to be calibrated every 6 months and we recommend they are routinely serviced to maximise their reliability and integrity. As an approved service and repair centre, we can guarantee a quick and reliable service whilst providing you with a loan unit until your unit is returned. If you would like to have your unit serviced, or your unit is faulty, please contact us on

0845 300 4082

The following service and repair options are available:

- Option 1:** Call by 2.00pm and a service loan unit will be despatched to you by 9.00am the next day and the unit will be collected from you
- Option 2:** Call by 2.00pm and a service loan unit will be despatched to you for next day delivery and the unit will be collected from you
- Option 3:** If you do not require a loan unit, you can return the unit to us directly (please contact us for full details)

When the unit has been serviced or repaired it will be returned directly to you in exchange for the loan unit.

All prices will be quoted at time of order.

**If you would like to have your unit serviced, or your unit is faulty,
